Weekly Meeting Minutes

Summer 2015

5/22/15

Discussed Github operation. Jon did a walkthrough for Eric and Danny on Github Basics.
Discussed Unity tutorials on thenewboston.com and unity websites.
Jon did a walkthrough of the existing project and parts of the code to help acclimate the rest of the team.
Agreed to a standing meeting on Monday evenings at 7pm via Google Hangout.

5/25/15

Finalized Roles for each member.
Jonathan - Software Developer
Jeremy - Software Developer
Eric - Testing and Documentation
Danny - Testing and Documentation, Software Development aide
Jonathan Passed the SOW to Eric, Finalizing the statement of work.

6/8/15

In getting acclimated to Unity, Eric had made a number of cosmetic changes to the project including the start screen, the background, the user interface, etc. (Note: All these changes were presented to Dr. Cline. She noted that she liked the way it was laid out prior to these changes being made, so the project was rolled back to the previous version.)
Briefly discussed adding sound and animation the start screen.
All 5 remaining objects have been coded for spawn and motion and are ready for the presentation on 6/11/15.

6/15/15

Working on object interactions.
Planned to contact Dr. Cline for a meeting to discuss interactions of objects

6/21/15

This meeting held on Sunday so all could attend.
Some conflict this week regarding timeliness of uploads of completed code.
Team was asked to attend a meeting with Dr. Lewis and Dr. Cline on Tuesday 6/23 to help resolve conflicts.
Jon helped Eric and Danny work through some issues with uploading to Github.
Subsequent to meeting with Drs. Lewis and Cline assignments were changed going forward. Eric would be responsible for the coding that remained for this term, Danny would handle all the documentation, Jeremy would take care of the tutorial development, and Jon would continue to research the pathing issue.

6/29/15

Discussed issues including receptor placement and spawning at the proper angle to the cell membrane.
Discussed making the receptor longer.
Discussed the need to get the design documentation from the spring semester from Dr. Lewis.
Assignments are continuing on schedule.

7/6/15
Discussed a debugging issue related to a null reference error on the receptor that Eric was seeing.
Discussed addition of a GTP object, but decided not to at this time due to time constraints.
Jeremy did a walkthrough of the tutorial he had developed to this point.
There would be a code review with Dr. Lewis and Eric on 7/7/15 in Dr. Lewis' office.

7/13/15
Discussed some final tweaks to project.
Pinch to zoom and pan have been successfully implemented.
Removing some of the colors from the objects per Dr. Cline.
Jon will implement his pathing changes this weekend.
Danny will finalize the SOW and all other relevant documentation.
Once all files are uploaded to Github, Jeremy will burn a DVD for the final submission.

7/20/15
Final meeting before final presentation on Thursday 7/23/15. We briefly discussed some of the organizational changes Jon had made on Github. We discussed our final presentation and who would handle each aspect. Danny will do the PowerPoint, Eric the software demo, Jeremy will demo the tutorial, and Jon will help field any questions, particularly those related to the project before this term. Planning arrival for presentation at 5pm.
